GENERAL CATALOGUE

OFFICERS AND STUDENTS

1837-1901

ANN ARBOR, MICH.
PUBLISHED BY THE UNIVERSITY
1902

Edition of Two Thousand Copies

PREFACE.

This edition of The General Catalogue follows in the main the plan of the edition of 1891. It aims to present in Part I. the names of all Officers of the University from the organization of the first Board of Regents in 1837 to December 31, 1901; in Part II., the names of all graduates of the University down to the same date; in Part III., the names of all students who matriculated before September, 1897, and who have not taken a degree here; and also names of deceased students who matriculated after that date.

Part I. has been divided into appropriate groups, and each group arranged in chronological order according to date of original appointment. The group entitled "Members of the Faculties," has been subdivided according to rank, and each subdivision has been arranged according to the same plan; namely, seniority of appointment. The title in italics after each name is the one last held. Following this, in smaller type, is a list in each case of titles previously held at this University. No names are inserted in this group below the rank of Instructor.

Part II. is arranged alphabetically by Classes under each Department of the University. A list of Honorary Degrees, also arranged by years, follows the Departmental lists. In Departments where higher degrees are conferred for post-graduate study, the lists of such graduates will be found in each case at the end of the class lists of the Department.

Part III. has been arranged under one alphabet rather than by Departments and Classes, for the obvious reason that no precise arrangement of that kind was possible. In the Literary Department a large part of these non-graduates entered as special students, and never became identified with any Class. Others were members of different Classes at different times. In the Professional Schools the same is true in lesser degree. Nor would it have been possible always to separate "special students" from those who were candidates for a degree.

In Parts II. and III. an attempt has been made to record address and occupation of the living, and date and place of death of those not living. In case of the Professional Schools it has been assumed that persons are following the occupations indicated by their professional degrees unless otherwise indicated. Where a graduate appears in more than one list, any subsequent recurrence of the name after the first entry is followed only by a back reference and by the address when known.

Special pains have been taken to record, with dates, academic degrees received elsewhere by our students. With reference to academic and other official positions, the editor has been much embarrassed in drawing the line of selection. County and municipal offices (excepting judgeships), postmasterships, membership in State legislatures and on boards of control, membership in learned societies, etc., have been generally omitted. To have made record of all these would have added many hundreds of items, and would have swelled the volume to undue proportions.

The necessity of making room for upwards of ten thousand new names in this edition has compelled the condensation of the records of the earlier classes as found in the edition of 1891. This applies especially to the military records. The new volume is therefore in some degree supplementary to the old one. Some copies of the former edition are still to be had, should any one desire to possess both editions.

Service in the Civil War is indicated by a dagger (†) prefixed to the name, and in most cases the latest rank attained has been indicated. Service in the Spanish War has been registered whenever the information was at hand, but no systematic effort was made to secure such information.

To names of persons known to be deceased an asterisk (*) is prefixed. Much care has been taken to make the record complete in this respect, but some blanks yet remain to be filled.

The editor has proceeded on the principle of excluding all conjecture, no matter how plausible, when known to be conjecture. Much information, more or less probable, but still lacking confirmation, has been received, but not used. No doubt some matter here recorded rested more or less on conjecture in the minds of those reporting it; but all possible diligence has been exercised by the editor in checking error. Official records have been constantly referred to whenever accessible. In the case of medical students, Polk's "Medical and Surgical Register of the United States" has been found an

invaluable aid, and a considerable number of items are recorded on the authority of that alone. Whenever it has been found practicable, however, the information has been verified by direct correspondence with the persons themselves.

No small difficulty has been encountered in making up the lists of non-graduates. The lists of graduates and non-graduates here given aggregate nearly thirty thousand names. It is manifest that in so large a number identical or similar names would appear in the same Department, or different Departments, often in close proximity of time. Owing to the fact that back of 1864 no records of students have been found except the printed lists in the Annual Catalogues, that in many cases only initials are given in the lists, and that numerous misprints occur in them, the difficulty of determining the identity or non-identity of the persons represented has often been very great. The care bestowed upon this portion of the work has, we believe, reduced the number of duplications very nearly or quite to zero; and the lists as now settled may be taken as a substantially complete roster of all persons who have matriculated at the University in the years covered by this record.

Owing to circumstances which need not here be related, the publication of this edition has been delayed nearly a year beyond what was at first contemplated. Advantage has been taken of this delay to insert the class of 1901 entire, and to bring the roll of officers down to December, 1901. Much of the material of the book is from one to two years old, however; and doubtless some removals and changes have occurred meantime which have not come to the notice of the editor.

No one who has not had personal experience with this line of work can have any proper conception of the labor involved in the preparation of a book of this character and magnitude. The record here presented is the result not only of patient inquiry, but also of much genuine historical research. The editor-in-chief has had the advice and co-operation throughout of Professor Pettee, to whose careful hand is due the preparation of Part I. and the Index of Officers. He has also checked through the entire Index of Graduates. The valuable summaries prepared by him for the edition of 1891 are missing here, on account of stress of other work which made revision impossible at this time; but it is his intention to complete them during the coming summer.

In taking final leave of a task that has consumed many years of his leisure, the editor may perhaps be pardoned a personal reference. Coming to the University as a student as early as the close of the Civil War, and having resided here almost continuously since that time, and having known personally a large number of the graduates of earlier date, the compiling and perfecting of this record of the great army of young people who with him have been "nursed upon the selfsame hill," has stirred in his heart many feelings of lively interest and satisfaction — mingled, alas, too often with sorrow for those untimely stricken down in the race. His only regret in laying aside the task is that a more complete record could not be preserved of the high endeavor and noble achievement of them all.

¹ The Department of Engineering was organized as a separate Department of the University in 1895. Prior to that date the courses leading to the various degrees in Engineering were given in the Department of Literature, Science, and the Arts.

Beginning with 1882 the degree of Engineer has been given only as an advanced degree.

The names of graduates of other institutions who have taken advanced degrees in this Department of the University are included in a special list of graduate students following the Class of 1901.

¹ Graduates of this School in the two years' course receive the degree of Pharmaceutical Chemist. In the four years' course the degree of Bachelor of Science in Pharmacy is given. This list follows the Masters of Pharmacy.

The degree of Master of Pharmacy is conferred on graduates who complete a prescribed course of advanced study. The list follows the Class of 1901.

The School of Pharmacy was organized as a separate Department of the University in December, 1876. Prior to that date the course leading to the degree of Pharmaceutical Chemist was given in the Department of Literature, Science, and the Arts.

¹ The following list of non-graduates is intended to include the names of all persons who matriculated in any Department of the University, prior to the beginning of the academic year 1897-98, and who have not taken a degree. It includes also the names of a few persons who matriculated subsequent to that date, and are not now living. From 1855 to 1877 the courses in analytical and applied chemistry, given in the Department of Literature, Science, and the Arts, were largely attended by medical students, whose names were printed in the annual calendars with the regular students of the Department. The names of such medical students, however, are not included in this list.

The italic letter immediately following each name indicates the Department; the figures, the period of attendance.
